Subject: RE: LPRSA- Figures - Shapefiles

Rob,

The intended purpose was for NOAA's review.

I spoke with my team and beyond the data sets with the SSP2 data, which from my understanding is not yet QC'ed, EPA should have the same base shapefiles. That would be the shoals and margins shapefile and the data shapefiles. Therefore, EPA can work with NOAA on their request. Nothing further on NOAA's request is needed from CPG at the moment.

Thanks,

Jennifer LaPoma

The CPG would also like to understand what her intended purpose(s) for the shapefiles of these figures. They are draft figures that were provided for discussion purposes - we did not intend to provide them to the Agencies at this time prior to final CPG review in advance of submitting the draft RI report.

Rob,

NOAA is asking for the shapefiles used to create the figures presented at our last technical meeting. Reyhan wanted to know if should get in touch with Marcia Greenblatt at Integral or someone at AECOM to discuss them. Please advise me if and who she may contact for these files. I'm not aware if these files have been shared in the past.

Thanks in advance,

Jen
